DERMATOLOGICAL SKIN RESURFACING

AZA touch

MULTI-PATHWAY SKIN CORRECTIVE ACID

THE CONCEPT

AZA touch works through multiple biological pathways by reducing the proliferation of acne-causing bacteria, suppressing inflammatory activity, normalising abnormal keratinisation to prevent follicular blockage, and inhibiting tyrosinase to reduce excess melanin production.

THE FUNCTION

It works by helping to normalise:

- keratinisation → clears and prevents blocked pores and comedones.
- microbial growth → reduces *Cutibacterium acnes*.
- excess sebum → sebostatic.
- inflammatory pathways → calm visible redness and acne.
- melanocyte activity → reduce post-inflammatory hyperpigmentation.

THE COMPOSITION

- Azelaic acid complex enhances skin corrective signalling across multiple biological pathways.
- H_2Oless technology keeps the azelaic acid complex in a waterless environment and azelaic acid in its solvation shell form → enhances availability and penetration.
- Shikonin is the red pigment from the roots of Shikonin oil (*Lithospermum erythrorhizon* extract) known for its antimicrobial, soothing, and skin-repairing properties.

THE MECHANISM

Powered by H_2Oless technology, AZA touch keeps the azelaic acid complex in an absorbable form for longer, increasing its opportunity for penetration into the skin. This multi-pathway skin corrective acid supports multiple biological pathways involved in blemish-prone skin, helping restore microbial balance, reduce inflammatory activity and visibly improve post-inflammatory hyperpigmentation.

THE OUTCOME

Skin appears healthier and more balanced, with visible improvements in blemishes, post-inflammatory hyperpigmentation and overall skin comfort.

THE POSITIONING

Formulated to enhance multidimensional signalling, supporting optimal skin health restoration.

APPLICATION

- As a spot application directly on active blemishes or post-inflammatory areas
- After MESORESURFACING™ concentrate
- In combination with A.C. | C.R. | M.E.L.A. multiresurfacing protocols.

This flexibility allows customisation according to skin concerns and treatment objectives.

PHILOSOPHY

Healthy skin depends on balanced biological processes. Through the synergy of carefully selected ingredients and controlled delivery, this formulation supports skin normalisation, helping restore clarity, reduce visible redness and promote a more even skin tone.

PRODUCT SIZE

2 x 4ml

INGREDIENTS (INCI)

Butylene Glycol, Propylene Glycol, Alcohol Denat., Azelaic Acid, Helianthus Annuus Seed Oil, Aqua (Water), Lithospermum Erythrorhizon Root Extract, Glycerin, Candida Bombicola/Glucose/Methyl Rapeseedate Ferment, Caprylic/Capric Triglyceride, Phospholipids.

PRODUCT DECRIPTION

AZA touch is a multi-pathway skin corrective acid that targets uneven skin texture (hyperkeratinisation), comedones, excess sebum, visible redness and post-inflammatory hyperpigmentation. The H_2Oless technology maintains the formulation in a waterless environment and azelaic acid in an absorbable form for longer, enhancing its opportunity for skin penetration. Shikonin, a natural plant-derived extract, provides antimicrobial, soothing and skin-repairing properties. The oil phase creates an optimal glide, enabling controlled massage, delivery and uniform distribution. Skin appears healthier and more balanced, with visible improvements in blemishes, post-inflammatory hyperpigmentation and overall skin comfort.

THE FORMULATION

KEY ACTIVE INGREDIENTS AND PROPERTIES	
10% Azelaic acid complex	Antibacterial, comedolytic, sebum-regulating and brightening activity.
H_2Oless technology	Keeps the formulation in a waterless environment and azelaic acid complex in its solvation shell form, enhancing the availability and penetration of azelaic acid into the skin.
Shikonin oil	Is a natural plant-derived extract containing Shikonin, a red pigment from the roots of *Lithospermum erythrorhizon*, known for its anti-inflammatory, antimicrobial, and skin-repairing benefits.

INDICATIONS

TYPICAL PATIENT	
Active or post-inflammatory blemishes Localised redness and reactivity Post-inflammatory hyperpigmentation Congested or uneven texture in photo-ageing skin	C.R. A.C. M.E.L.A.
Fitzpatrick I - VI	

pH TIPS

Formulated to complement multidimensional signalling focused skin resurfacing protocols:

- As a spot application directly on active blemishes or post-inflammatory areas
- After MESORESURFACING™ concentrate
- In combination with A.C. | C.R. | M.E.L.A. multiresurfacing protocols.

Layer and leave on.

The number of layers and application technique will influence the strength of treatment and depth of skin penetration.

AZA TOUCH:
SIGNAL ENHANCEMENT
AZA touch is a multi-pathway skin corrective acid formulated to enhance multidimensional signalling protocols.

It is formulated to:

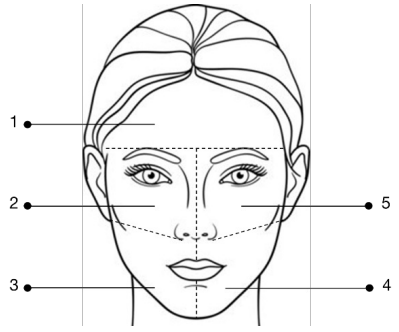

- clear and prevent blocked pores and comedones.
- reduce *Cutibacterium acnes* through antimicrobial activity.
- regulate excess sebum.
- calm visible redness.
- reduce post-inflammatory hyperpigmentation.

Smaller treatment area

1. FOREHEAD - 1 DROP
2. LEFT CHEEK – 1 DROP
3. JAWLINE – 1 DROP
4. RIGHT CHEEKS – 1 DROP

Larger treatment area

1. FOREHEAD – 1 DROP
2. LEFT CHEEK – 1 DROP
3. LEFT JAWLINE & UPPER LIP – 1 DROP
4. RIGHT JAWLINE & UPPER LIP – 1 DROP
5. RIGHT CHEEK – 1 DROP

TIME DURATION: 30 min

1. CLEANSE

E.X.F.O. cleanse - Cleanse the treatment area thoroughly and remove with dampened gauze or cotton pads. Pat dry.

2. DEGREASE

S.K.I.N. primer - Spray S.K.I.N. primer on gauze or cotton pads and wipe over the entire treatment area. Repeat in areas with excess sebum.

3. SKIN PERMEABILITY & SENSITIVITY

S.P. complex - Decant 1 pipette in a small glass bowl. Apply a thin layer with a fan brush. Leave for 2 minutes and remove with dampened cotton pads. Assess skin tolerance: redness and sensitivity (0-10).

4. ACTIVATE + ENHANCE

OPTION A:

MESORESURFACING™ concentrate level 1 or 2 - Shake vial. Use provided pHformula applicator to apply 1 drop per zone. Follow treatment diagram. Gloves mandatory. Follow with AZA touch.

AZA touch – Shake the vial before opening. Use provided pHformula applicator to apply 1 drop per zone according to the treatment diagram and massage into the skin. 1-3 Layers. Gloves mandatory.

OPTION B:

A.C. 1 or 2 mild solution / A.C. 1+2 solution / A.C. 1 or 2 solutions (spot treatment until frosting is achieved)
C.R. 1 or 2 complex (skip S.P. complex)
M.E.L.A. 1 or 2 powerclay™
according to treatment objectives and skin goals. Follow with AZA touch.

AZA touch – Shake the vial before opening. Use provided pHformula applicator to apply either (a) 1 drop per zone according to the treatment diagram or (b) apply as a spot treatment on problem areas. Massage into the skin. Gloves mandatory.

5. MASK

Apply mask of choice.

6. CALM & HYDRATE

OPTION A:

AZ blue drops - Apply a pure, concentrated drop to each area as needed and follow with P.O.S.T. recovery cream or SOS repair cream.

OPTION B:

AZ blue drops + P.O.S.T. recovery gel - Mix 1-2 AZ blue drops with P.O.S.T. recovery gel to enhance hydration and support post-treatment recovery.

7. PROTECT

U.V. protect SPF 30 - Complete the treatment by applying the broad-spectrum sun protection factor.
