

EXOS biomimetic concentrate

A CELLULAR COMMUNICATION CONCENTRATE

EXOS biomimetic concentrate

A CELLULAR COMMUNICATION CONCENTRATE

THE CONCEPT

EXOS biomimetic concentrate is formulated to support cellular communication during periods of increased biological activity. The formula combines biomimetic exosomes, liposomal growth factors and a DNA Protect Complex to help maintain an environment where communication processes can function efficiently, supporting skin renewal, adaptation and resilience.

THE FUNCTION

- Enhances cellular communication pathways
- Promotes skin vitality, firmness and elasticity
- Facilitates skin adaptation and recovery following professional treatments
- Helps protect against oxidative and environmental stress

THE COMPOSITION

A synergistic combination of Biomimetic Exosomes, Liposomal Growth Factors and DNA Protect Complex, each selected for its complementary biological function.

- Biomimetic Exosomes support cellular communication involved in renewal and adaptation processes.
- Liposomal Growth Factors support biological pathways associated with extracellular matrix organisation and skin quality.
- DNA Protect Complex supports cellular resilience against oxidative and environmental stressors.

THE MECHANISM

EXOS biomimetic concentrate supports multiple communication pathways simultaneously. Biomimetic exosomes facilitate cellular signalling, liposomal growth factors support coordinated renewal processes, while the DNA Protect Complex helps maintain cellular function under environmental stress. Together, these technologies help create an environment where skin can coordinate repair, adaptation and resilience more efficiently.

THE OUTCOME

Skin appears more resilient, revitalised and luminous, with visible improvements in hydration, elasticity, firmness and overall skin quality.

THE POSITIONING

A professional cellular communication concentrate formulated to complement advanced skin resurfacing and signal enhancement protocols. Particularly suited for skin presenting signs of ageing, environmental stress exposure, diminished vitality or reduced recovery capacity.

APPLICATION

EXOS biomimetic concentrate is formulated for flexible integration:

- Apply directly to the skin as a concentrated serum.
- Use with nanoneedling protocols.
- Use with microneedling protocols.

This adaptability allows customised treatment approaches aligned with individual skin needs and treatment objectives.

PHILOSOPHY

Healthy skin depends on effective cellular communication. EXOS biomimetic concentrate supports the signals involved in renewal, adaptation and resilience, helping the skin coordinate its natural responses during periods of increased biological activity. Rather than directing skin behaviour, the technology supports the skin's own capacity to organise and optimise these processes.

EXOS biomimetic concentrate

PRODUCT SIZE
4 x 4 mL ampoules

INGREDIENTS (INCI)

Aqua (Water), Pentylene Glycol, Disodium Phosphate, Sodium Chloride, Glycerin, Propanediol, Sodium Phosphate, Glycogen, Xanthan Gum, Chlamydomonas Reinhardtii Extract, Lecithin, Phenoxyethanol, Acetyl Glutamine, Bacillus/Soybean Ferment Extract, 1,2-Hexanediol, Butylene Glycol, Caprylyl Glycol, Polyglyceryl-4 Caprate, Folic Acid, Sodium Hyaluronate, Hexapeptide-11, Oligopeptide-1, Oligopeptide-2, Oligopeptide-3.

PRODUCT DESCRIPTION

EXOS biomimetic concentrate is a sterile professional concentrate formulated with biomimetic exosomes, liposomed growth factors and a DNA Protect Complex. The formulation supports cellular communication pathways involved in skin adaptation, resilience and renewal. Through a communication-focused approach, EXOS biomimetic concentrate helps support skin vitality, hydration, firmness and recovery while helping maintain efficient cellular function during periods of increased biological activity. The result is skin that appears healthier, more resilient and visibly revitalised.

KEY ACTIVE INGREDIENTS AND PROPERTIES

Biomimetic Exosomes	Facilitate cellular communication involved in skin renewal, adaptation and resilience
Liposomed Growth Factors	Promote pathways associated with collagen, elastin and extracellular matrix organisation
DNA Protect Complex (Marine Glycogen)	Strengthens cellular resilience against oxidative and environmental stress
Fermented Folic Acid	Energises cellular metabolic activity
Acetyl Glutamine	Optimises nutrient availability and cellular function

INDICATIONS

TYPICAL PATIENT

Signs of ageing and photoageing
Diminished skin vitality
Reduced elasticity and firmness
Dehydrated skin
Dull and fatigued skin
Environmentally stressed skin
Reduced recovery capacity

AGEING
PIGMENT
ACNE
REDNESS

Fitzpatrick I - VI

pH TIPS

EXOS biomimetic concentrate may be used:

- Applied directly on the skin as a concentrated serum. Apply 3 layers during the treatment and provide the remaining product in the vial (leftover) to the client for home use as a concentrate serum within the following 24 hours
- With nanoneedling
- With controlled microneedling
- Following controlled dermatological skin resurfacing protocols
- Combined with MESORESURFACING™ concentrate

LEAVE ON. DO NOT REMOVE FROM SKIN.

EXOS BIOMIMETIC CONCENTRATE SIGNAL OPTIMISATION SUPPORT

EXOS biomimetic concentrate is formulated to enhance the optimisation phase following skin resurfacing and signal enhancement protocols.

It is designed to:

- Optimise cellular communication
- Reinforce skin vitality and resilience
- Restore hydration and skin luminosity
- Strengthen skin firmness and elasticity
- Accelerate cellular recovery processes
- Sustain protection against environmental stress

SMALLER TREATMENT AREA

- | | |
|----------------|-----------------------|
| 1. Forehead | 5. Left-side of neck |
| 2. Left cheek | 6. Right-side of neck |
| 3. Jawline | 7. Left décolleté |
| 4. Right cheek | 8. Right décolleté |

LARGER TREATMENT AREA

- | | |
|------------------------------|-----------------------|
| 1. Forehead | 6. Left-side of neck |
| 2. Left cheek | 7. Right-side of neck |
| 3. Left jawline & upper lip | 8. Left décolleté |
| 4. Right jawline & upper lip | 9. Right décolleté |
| 5. Right cheek | |

TREATMENT - PROFESSIONAL APPLICATION STEPS FOR ADVANCED SKIN SPECIALIST

1. CLEANSE

E.X.F.O. cleanse - Cleanse the treatment area thoroughly and remove with dampened gauze or cotton pads. Pat dry.

2. DEGREASE

S.K.I.N. primer - Spray S.K.I.N. primer on gauze or cotton pads and wipe over the entire treatment area. Repeat in areas with excess sebum.

3. SKIN PERMEABILITY & SENSITIVITY

S.P. complex - Decant 1 pipette in a small glass bowl. Apply a thin layer with a fan brush. Leave for 2 minutes and remove with dampened cotton pads. Assess skin tolerance: redness and sensitivity (0-10).

4. MESORESURFACING™ (OPTIONAL)

MESORESURFACING™ concentrate level 1 or 2 - Shake vial. Use provided pHformula applicator to apply 1 drop per zone. Follow treatment diagram. Gloves mandatory.

5. RESURFACE

C.R. 1 or 2 complex (skip S.P. complex)
A.C. 1 or 2 mild solutions / A.C. 1+2 solution /
A.C. 1 or 2 solutions
M.E.L.A. 1 or 2 powerclay™
A.G.E. 1 or 2 mild solutions / A.G.E. 1+2 solution /
A.G.E. 1 or 2 solutions

6. EXOS biomimetic concentrate

Shake EXOS biomimetic concentrate vial. Use pHformula sterile applicator to apply 1 drop per zone. Follow treatment diagram. Gloves mandatory.

7. MASK (OPTIONAL)

Apply mask of choice.

8. CALM & HYDRATE

OPTION A:

AZ blue drops - Apply a pure, concentrated drop to each area and follow with P.O.S.T. recovery cream or SOS repair cream.

OPTION B:

AZ blue drops + P.O.S.T. recovery gel - Mix 1-2 AZ blue drops with P.O.S.T. recovery gel to enhance hydration and support post-treatment recovery.

9. PROTECT

U.V. protect SPF 30 - Complete the treatment by applying the broad-spectrum sun protection factor.
